

# MOBILE EV BATTERY SERVICE CENTRES

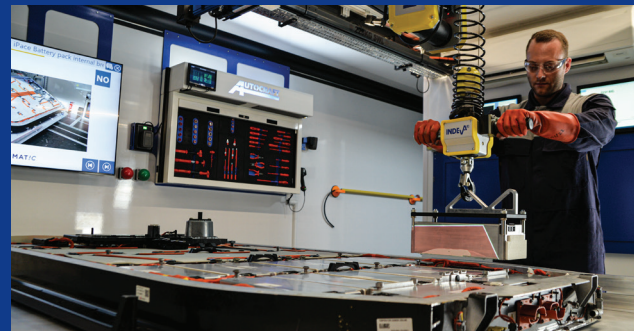

## EXPANDABLE & HIGHLY MOBILE FACILITY FOR FULL TRIAGE, REPAIR & REMANUFACTURE OF EV BATTERY PACKS

REVIVE™ MOBILE is easily transferable between locations with self-unloading and deploying from a HGV trailer:

- Capacity of 6 packs per day based upon a 70/30 PHEV to BEV volume requirement
- Off-grid option for enhanced environmental sustainability and reduced electricity costs
- Staffed by either customer or Autocraft technicians and fully supported from our UK Tech Centre

### Capabilities include:

- Testing, diagnostic analysis, repair and remanufacture of EV battery packs
- Unique, patented Autocraft advanced testing to establish accurate State-of-Health to module level, so modules are correctly graded either for re-use in vehicles, 2<sup>nd</sup> life application or for recycling if no longer viable
- Enhanced safety controls to protect technicians with camera guided processes and interlocked tools
- Eject function for the automatic removal and isolation of any packs experiencing an abnormal or thermal event
